October 5, 2011

To Whom It May Concern,

In 2010 I chaired a 25person design committee for our hallway renovation at 10 W 66 Street in NYC. JMPB Enterprises was awarded the contract for the project after an extensive interview process and the committee and shareholders in general were very pleased with their performance.

Led by their field super Richard Kofrit they executed a 1.3 million dollar renovation with highly organized project management, minimal disruption to residents and exceptional quality of work. The project was also delivered on time.

I strongly recommend JMPB for other projects, and invite any serious committee members to walk though our building to see it for themselves. I would also be happy to meet with you personally or speak to you on the phone if you have any questions.

Sincerely,

Alisa Kauffman, DMD
