

To Those Concerned:

JMPB Enterprises LLC, was the General Contractor for renovation of Waterside Plaza consisting of 137 corridors in four residential towers housing over 3,000 residential tenants. The work included 12,200 yards of new carpeting, 24,000 yards of new vinyl wall covering, 42,000 feet of new custom designed wood crown moldings and ceramic tiling, 1,700 new ceiling fixtures and entirely new lighting, re-plastering and repainting, and new signage throughout. JMPB was invaluable in helping us and our architect from the beginning of the planning for the project.

Not simply did they help us organize the project, but they were instrumental in assisting us in locating suppliers and improving the quality of our decisions. Their experience helped in making a job of this magnitude go smoothly. As one might expect, the process of orchestrating this much work in occupied buildings was difficult and required masterful coordination. The project went without any major problems, was on budget, and the 16-week deadline was met one day ahead of schedule.

I can wholeheartedly recommend JMPB.

Sincerely,

Arthur Zabarkes
Managing Director
